

STUDENTS USING CHAT GPT

Chat GPT has become an educational tool that can assist a student with their education.

However, it is imperative that students use these tools ethically. Here is some information for students to consider.

1: DISCUSS USING CHAT GPT WITH YOUR INSTRUCTOR

There continues to be a difference of opinion amongst faculty members whether to incorporate Chat GPT or not. Ask your instructor before it's too late. Your instructor should provide you with a safe space for discussion and provide examples of whether Chat GPT is acceptable or not.

2: CHAT GPT IS DESIGNED TO HELP STUDENTS

Chat GPT can help a student generate ideas to begin an assignment and improve writing quality. However, it is not designed to do assignments for you. Understand the difference.

3: CHAT GPT IS NOT PERFECT

While it is a useful tool, it does not always find credible and accurate resources for students to support their ideas in writing assignments.

4: CHAT GPT AND ETHICS

Chat GPT does not have a "moral compass." Chat GPT collects information from the Internet and cannot determine the difference between right and wrong.

5: CHAT GPT AND AN ACADEMIC INTEGRITY

You can still have an academic integrity allegation brought against you for using Chat GPT. Ask your instructor how.
