

ENVIRONMENTAL SCIENCES SEMINAR SERIES, **WINTER 2025**

Date(s): Mar 6, Mar 13

Speaker: Dr Laura Sierra Zapata

Title: The microbiome's One Health connection: linking pets, people, and the environment

Abstract: Did you know your pet's microbiome holds secrets to a healthier world? This talk will uncover the surprising ways pets, people, and the environment are connected through tiny microbes. From supporting well-being to balancing ecosystems, we'll explore how these unseen allies shape our lives. Discover the amazing role your furry friends play in keeping everyone - humans and animals alike - healthier and happier. Join us for a fascinating journey into the invisible world of microbes and their power to bring us closer together.
